

WAJIHA RUBAB

Python Developer | Django Backend & Web Applications | SQLite | OOP

Open to Part-Time & Remote Developer Roles

+92-323-8214355 • wajiharubab648@gmail.com • Bahawalpur, Pakistan • [linkedin.com/in/wajiha-rubab](https://www.linkedin.com/in/wajiha-rubab) • github.com/wajiharubab648-coder

PROFESSIONAL SUMMARY

Python developer with hands-on experience building and shipping multiple projects spanning Django web applications, desktop software, computer-vision tools, data visualization, and system-level automation. Primary focus on backend web development — Django ORM, role-based access control, server-side routing, and database design — with additional experience in desktop GUIs (Tkinter, SQLite3), real-time image processing (OpenCV), and Python automation scripting. Comfortable across the full stack and looking for a part-time or remote Software Engineering / Web Development role to contribute to real projects.

FEATURED PROJECTS

E-Learning Management System (LMS) | Python, Django, SQLite

GitHub: github.com/wajiharubab648-coder/eLearn-Django-LMS

- Built a web-based learning platform using Django, Python, and SQLite to manage course catalogs, media assets, and user enrollments.
- Engineered Role-Based Access Control (RBAC) to enforce distinct permissions and custom dashboard views for Students and Instructors.
- Structured custom Django views, ORM queries, and form validations to handle authentication, course workflows, and template rendering securely.

Real-Time Webcam Face Detector | Python, OpenCV, Haar Cascade Classifier

GitHub: github.com/wajiharubab648-coder/webcam-face-detector

- Developed a real-time face-detection application using OpenCV that captures live video from a webcam and processes each frame on the fly.
- Applied a Haar Cascade classifier with tuned scaleFactor and minNeighbors parameters, rendering live bounding boxes around detected faces with clean keyboard-driven exit controls.

Desktop Bookstore Management System | Python, Tkinter, SQLite3

GitHub: github.com/wajiharubab648-coder/bookstore-management-system

- Built a full-featured desktop application for managing bookstore inventory, sales, and records, with a Tkinter GUI for intuitive user interaction.
- Designed and integrated an SQLite3 database layer to persist book records and handle CRUD operations, then packaged the app into a standalone Windows executable.

Python Website Blocker | Python, OS-Level File Handling

GitHub: github.com/wajiharubab648-coder/Website-Blocker

- Built a Python automation tool that blocks and unblocks distracting websites by directly modifying the system's hosts file to support focused work sessions.
- Applied OS-level file I/O and administrative permission handling to safely read and write protected system files.
- Used Python's datetime and time libraries to implement scheduling logic for automatic, time-based blocking windows.

Interactive World Map & Volcano Visualizer | Python, Pandas, Folium

GitHub: github.com/wajiharubab648-coder/interactive-data-map

- Used Pandas to clean and process geographic coordinate data from raw text and CSV files.
- Leveraged Folium to build an interactive map with dynamically generated, clickable location markers and polygon styling.
- Handled GeoJSON data to accurately render international boundaries, generating a standalone HTML report for easy sharing.

ADDITIONAL PROJECTS

Web-Based GPA Calculator (Python, Flask, HTML5/CSS3) — Flask app that calculates semester and cumulative GPA from user-entered grades, with server-side validation and dynamic results. [github.com/wajiharubab648-coder/gpa-calculator-flask]

Interactive Dictionary (Python, JSON) — Command-line word-lookup tool backed by a structured JSON database, with fuzzy-match logic to suggest corrections for typos. [github.com/wajiharubab648-coder/MY-dictionary]

TECHNICAL SKILLS

Python (OOP) • Django (ORM, RBAC) • SQLite3 • Tkinter • OpenCV • Pandas • Folium • Git & GitHub • Data Structures • HTML5 & CSS3 • OS Automation • Debugging

EDUCATION

Bachelor of Science in Information Technology

The Government Sadiq College Women University, Bahawalpur

Aug 2024 – Jun 2028
